Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, drawn to generator unit attachable to a tractor classified in 290 subclass 55.
 - II. Claims 6-10, drawn to generator unit driven by a hydraulic motor classified in 290 subclass 1C.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as using the mechanical power of the truck to generate electrical current ,which can be used for lighting and also the invention II has separate utility such as converting the rotating shaft of the truck to generate hydraulic pressure to use operating a jack of crane . See MPEP § 806.05(d).
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
5. A telephone call was made to Applicant's representative on September 25, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
